Investing involves risk, including the possible loss of principal and fluctuation of value. There is no assurance the stated objective(s) will be met.

Environmental, Social and Governance (ESG) or sustainable investing considers factors beyond traditional financial analysis. This may limit available investments and cause performance and exposures to differ from, and potentially be more concentrated in certain areas than, the broader market.

Foreign securities are subject to additional risks including currency fluctuations, political and economic uncertainty, increased volatility, lower liquidity and differing financial and information reporting standards, all of which are magnified in emerging markets.

Active Share represents the portion of portfolio holdings that differ from an index.

MSCI World IndexSM reflects the equity market performance of global developed markets.

Net expense ratios reflect the expense waiver, if any, contractually agreed to through at least 6/30/21.

INVESTORS

Foreign securities are subject to additional risks including currency fluctuations, political and economic uncertainty, increased volatility, lower liquidity and differing financial and information reporting standards, all of which are magnified in emerging markets.

Increased portfolio turnover may result in higher expenses and potentially higher net taxable gains or losses.

Derivatives can be highly volatile and more sensitive to changes in economic or market conditions than other investments. This could result in losses that exceed the original investment and may be magnified by leverage.

Real estate securities, including Real Estate Investment Trusts (REITs) may be subject to additional risks, including interest rate, management, tax, economic, environmental and concentration risks.

Growth stocks are subject to increased risk of loss and price volatility and may not realize their perceived growth potential.

There are special risks associated with selling securities short. Stocks sold short have the potential risk of unlimited losses.

Initial Public Offerings (IPOs) are highly speculative investments and may be subject to lower liquidity and greater volatility. Special risks associated with IPOs include limited operating history, unseasoned trading, high turnover and non-repeatable performance.

High-yield or "junk" bonds involve a greater risk of default and price volatility and can experience sudden and sharp price swings.

Fixed income securities are subject to interest rate, inflation, credit and default risk. The bond market is volatile. As interest rates rise, bond prices usually fall, and vice versa. The return of principal is not guaranteed, and prices may decline if an issuer fails to make timely payments or its credit strength weakens.

Concentrated investments in a single sector, industry or region will be more susceptible to factors affecting that group and may be more volatile than less concentrated investments or the market as a whole.

Investing involves market risk; principal loss is possible. Equity and fixed income securities are subject to various risks including, but not limited to, market risk, credit risk and interest rate risk.

Diversification neither assures a profit nor eliminates the risk of experiencing investment losses.

Performance of the Global Allocation Funds depends on that of the underlying funds. They are subject to the volatility of the financial markets. Because Janus Capital Management is the adviser to the Fund and to the underlying affiliated funds held within the Fund, it is subject to certain potential conflicts of interest.

The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered

C-0720-31701 10-15-20

a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. Ratings may vary by share class.

Funds were selected based on a 4 or 5 star Overall Morningstar Rating™. Janus Henderson has other funds ranked/rated lower by Morningstar.

Ratings and/or rankings do not indicate positive performance.

As of 6/30/20, Janus Henderson Balanced Fund Class D Shares Morningstar Ratings™ in the Allocation--50% to 70% Equity category: 5 stars out of 636 funds, 5 stars out of 558 funds and 5 stars out of 412 funds, for the 3-, 5-, and 10-year periods, respectively.

As of 6/30/20, Janus Henderson Global Life Sciences Fund Class D Shares Morningstar Ratings™ in the Health category: 4 stars out of 135 funds, 3 stars out of 125 funds and 5 stars out of 104 funds, for the 3-, 5-, and 10-year periods, respectively.
