

Mid Cap Value Fund

D: JNMCX

as of 12/31/18

Portfolio Construction Insight

Traditional Equity

Defensive Mid-Cap Value Exposure

Why Invest

- ▶ Focuses on mitigating losses in down markets while participating in up markets
- ▶ Disciplined valuation process which measures downside risk before upside potential
- ▶ Designed to compound returns over a full market cycle with lower volatility than peers and the index

Portfolio Management

Sub-advised by Perkins® Investment Management LLC

Kevin Preloger
Manager since 2013

Justin Tugman, CFA
Manager since 2015

Index represents the Russell Midcap® Value Index.

Performance for Class D Shares that includes periods prior to 2/16/10 reflects the performance of one or more share classes of the Fund or a predecessor fund, adjusted, where applicable and permitted, for differing fees and expenses. See the Fund's prospectus for further details.

Returns include reinvestment of dividends and capital gains. Returns greater than one year are annualized.

This Fund has a performance-based management fee that may adjust up or down based on the Fund's performance.

Holdings are subject to change without notice.

There is no assurance the stated objective(s) will be met.

Equity country, regional, sector and industry weights based on MSCI and GICS classifications. Fixed income country, regional, sector and industry weights based on Barclays classifications.

Investing involves market risk and it is possible to lose money by investing. Investment return and value will fluctuate in response to issuer, political, market and economic developments, which can affect a single issuer, issuers within an industry, economic sector or geographic region, or the market as a whole.

Real estate securities, including Real Estate Investment Trusts (REITs) may be subject to additional risks, including interest rate, management, tax, economic, environmental and concentration risks.

Index performance does not reflect the expenses of managing a portfolio as an index is unmanaged and not available for direct investment.

Russell Midcap® Value Index reflects the performance of U.S. mid-cap equities with

lower price-to-book ratios and lower forecasted growth values. **Alpha** compares risk-adjusted performance relative to an index. Positive alpha means outperformance on a risk-adjusted basis. **Beta** measures the volatility of a security or portfolio relative to an index. Less than one means lower volatility than the index; more than one means greater volatility. **R-squared (R²)** measures the relationship between portfolio and index performance on a scale of 0.00 (0%) to 1.00 (100%). A higher R² indicates more of the portfolio's performance is affected by market movements and vice versa. **Standard Deviation** measures historical volatility. Higher standard deviation implies greater volatility. **Sharpe Ratio** measures risk-adjusted performance using excess returns versus the "risk-free" rate and the volatility of those returns. A higher ratio means better return per unit of risk. **Active Share** represents the portion of portfolio holdings that differ from an index. **Turnover** is a measure of portfolio trading activity. Higher turnover may indicate higher transaction costs and vice versa.

Please consider the charges, risks, expenses and investment objectives carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, please call Janus Henderson at 800.525.3713 or download the file from janushenderson.com/reports. Read it carefully before you invest or send money.
