

Multi-Sector Income Fund

D: JMUDX

as of 12/31/18

Portfolio Construction Insight

Diversifying Fixed Income

High, Consistent Income Potential

Why Invest

- ▶ Leverages a bottom-up, fundamentally driven process that focuses on identifying the best risk-adjusted opportunities
- ▶ Seeks high, consistent monthly income with lower volatility than a dedicated high yield strategy
- ▶ Typically holds 35% to 65% in below investment grade bonds

Portfolio Management

Seth Meyer, CFA
Manager since 2014

John Kerschner, CFA
Manager since 2014

John Lloyd
Manager since 2014

Fund Overview

Objective: **High current income with a secondary focus on capital appreciation**

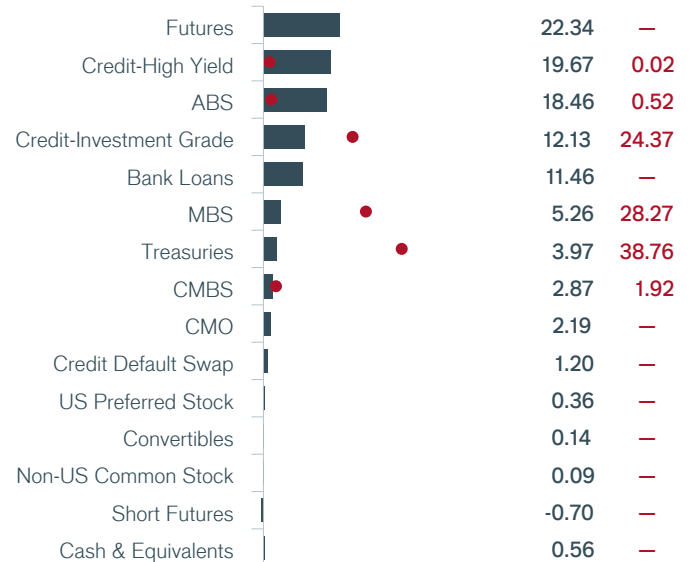

Morningstar Category: **Multisector Bond**

Assets: **\$612.79M**

Inception Date: **2/28/14**

Sector Allocation (%)

■ Fund ● Bloomberg Barclays U.S. Aggregate Bond Index

Calendar Year Returns (%)

■ Class D Shares ■ Bloomberg Barclays U.S. Aggregate Bond Index

Expense Ratios (%)

	Gross	Net
Class D	0.98	0.79

Net expense ratios reflect the expense waiver, if any, contractually agreed to through 11/1/19.

Performance (%)

	4Q18	1 yr	3 yr	5 yr	10 yr	Since Inception (2/28/14)
Class D Shares	-1.06	0.45	4.94	—	—	3.87
Bloomberg Barclays U.S. Aggregate Bond Index	1.64	0.01	2.06	—	—	2.18

Returns quoted are past performance and do not guarantee future results; current performance may be lower or higher. Investment returns and principal value will vary; there may be a gain or loss when shares are sold. For the most recent month-end performance call 800.525.3713 or visit janushenderson.com/allfunds.

Multi-Sector Income Fund (as of 12/31/18)

Fund Characteristics

Number of Holdings: Debt Issues	403

Credit Quality of Fixed Income Holdings (%)

	Fund	Index
Aaa	11.34	72.73
Aa	0.26	3.65
A	1.67	10.01
Baa	21.13	13.57
Ba	19.51	0.02
B	13.07	—
Caa	2.77	—
Not Rated	29.24	0.02

Bond credit quality ratings provided by Barclays and reflect the middle rating received from Moody's, Standard & Poor's and Fitch, where all three agencies have provided a rating. If only two agencies rate a security, the lowest rating is used. If only one agency rates a security, that rating is used. Ratings are measured on a scale that ranges from Aaa (highest) to D (lowest).

Developed vs. Emerging Market Exposure (%)

	Fund	Index
U.S.	76.72	91.66
Non-U.S. Developed	13.18	5.29
Other	9.21	1.49
Non-U.S. Emerging	0.33	1.56

Janus Henderson
INVESTORS

Index represents the Bloomberg Barclays U.S. Aggregate Bond Index.

Returns include reinvestment of dividends and capital gains. Returns greater than one year are annualized.

There is no assurance the stated objective(s) will be met.

Equity country, regional, sector and industry weights based on MSCI and GICS classifications. Fixed income country, regional, sector and industry weights based on Barclays classifications.

Investing involves risk, including the possible loss of principal and fluctuation of value.

Foreign securities are subject to additional risks including currency fluctuations, political and economic uncertainty, increased volatility, lower liquidity and differing financial and information reporting standards, all of which are magnified in emerging markets.

Fixed income securities are subject to interest rate, inflation, credit and default risk. The bond market is volatile. As interest rates rise, bond prices usually fall, and vice versa. The return of principal is not guaranteed, and prices may decline if an issuer fails to make timely payments or its credit strength weakens.

High-yield or "junk" bonds involve a greater risk of default and price volatility and can experience sudden and sharp price swings.

Derivatives can be highly volatile and more sensitive to changes in economic or market conditions than other investments. This could result in losses that exceed the original investment and may be magnified by leverage.

There are special risks associated with selling securities short. Stocks sold short have the potential risk of unlimited losses.

Increased portfolio turnover may result in higher expenses and potentially higher net taxable gains or losses.

Index performance does not reflect the expenses of managing a portfolio as an index is unmanaged and not available for direct investment.

Bloomberg Barclays U.S. Aggregate Bond Index is a broad-based measure of the investment grade, US dollar-denominated, fixed-rate taxable bond market. **Alpha** compares risk-adjusted performance relative to an index. Positive alpha means outperformance on a risk-adjusted basis. **Beta** measures the volatility of a security or portfolio relative to an index. Less than one means lower volatility than the index; more than one means greater volatility. **R-squared (R²)** measures the relationship between portfolio and index performance on a scale of 0.00 (0%) to 1.00 (100%). A higher R² indicates more of the portfolio's performance is affected by market movements and vice versa. **Standard Deviation** measures historical volatility. Higher standard deviation implies greater volatility. **Sharpe Ratio** measures risk-adjusted performance using excess returns versus the "risk-free" rate and the volatility of those returns. A higher ratio means better return per unit of risk. **Duration** measures a bond price's sensitivity to changes in interest rates. The longer a bond's duration, the higher its sensitivity to changes in interest rates and vice versa.

Please consider the charges, risks, expenses and investment objectives carefully before investing.
